Dania – Attached is the SSC for the Eureka Mills SF site. EPA initially signed an SSC with Utah in 2003 but that was only for the fund-lead work at the Gemini-Bullion Beck OU. By 2004, things had changes significantly and EPA was now doing the remedial action at 90% of the site so we re-drafted the SSC and included both the Gemini-Bullion Beck work as well as the Residential cleanup and the other mine waste areas. However, the 2004 SSC did not clearly spell out the State's O/M responsibilities and its responsibilities for ensuring ICs. So in 2009, the 2004 SSC was amended. Another new SSC was not drafted – instead the amendment only addressed those sections of the SSC that were relevant. So one needs to in essence read two documents side-by-side. The 2009 amendment also included a number of attachments – maps, the O/M plan etc.

You were interested in the MS Word version of the SSC. Unfortunately, I could not locate the Word version of the original 2004 SSC. I do have the word version of the amendment and I obtained a copy of the SSC in a pdf format from the SFRC which I have attached. If you have more questions, please let me know. Thanks.

P.S. – there is a slim chance that I may have transmitted the MS Word version of the 2004 SSC to Armando. I can check with him when he is in the office next if you need me to.
